

Ornithology B/C
Science Olympiad 2010

1. The event manager prefers the Robbins Field Guide. He will use information that CAN be found in Petersons however, but will not limit questions to just that resource except for ID. To be put another way, ID and Taxonomy will come from Petersons, BUT other questions can come from any valid general ornithology text.

2. "Live" mounts will be used wherever possible. There will be as few photos as possible.
