

Pentathlon B

Science Olympiad 2010

1. The format of this event will be different from those given in the National Science Olympiad Coach's B Division Manual. Instead of a relay as described in the book, the team of 4 students will meet at their chosen time, decided which station they will go to, and then they will all be released at the same time to go to their stations. So, they will all be doing their physical challenge and then answering their academic question(s) at the same time.
2. The time it takes for all four of the team members to complete their station and return together will be recorded. The lowest team overall will determine the winner.
3. The team will also have a fifth station where the students will work together as a team to complete another physical task and academic challenge. This station and the time required to complete it will act as a tie-breaker.
4. At each of the four stations, students will be asked up to three questions ranging from difficult to easy.
